

Skilled Nursing and Rehabilitative Care

Professional, Responsive Care

Where healthy living begins.

Skilled nursing *that ensures peace of mind.*

Well-being and self-sufficiency. Comfort, dignity and safety. The highest standards of care. By continually assessing their health status, we make sure that everything we do enhances quality of life for those who require our skilled nursing care.

Through appropriate exercise programs and on-site speech, occupational and physical therapy, our staff delivers diligent care, helping with the rebuilding of lost capacities and improvement of strength and mobility. Our state-of-the-art wound care and IV treatment also accelerate and ease recoveries.

We inform and involve loved ones, because our goal is simple: to create an open, healing environment filled with assistive technology, professional care and compassion.

All the comforts of home.

Those under our care are encouraged to make their space feel like home, by personalizing their rooms with mementos and keepsakes.

We do our part, too, creating a comfortable atmosphere filled with high-quality furnishings, natural light and views of Edgehill's park-like surroundings.

And three times daily, meals are delivered. Fresh ingredients, healthy choices, attractive presentations — with care taken to meet each individual's personal dietary needs. Our wait staff is specially trained to anticipate individual preferences — and to provide all the assistance desired.

Care for the whole person.

Spirit, mind and body — we tailor plans for each person's activities and recreation, taking into account the familiar routines and long-held interests that give meaning to an individual's life.

New opportunities can fit, too. Curiosity and learning are vital for thriving adults of any age or circumstance, so we make sure boredom never occurs and there is plenty to eagerly anticipate every day.

Exceptional compassion. Unmatched professionalism.

Our reputation depends on our staff. We employ only those whose dedication, expertise and aptitude for working with seniors and their families meet our stringent requirements.

Our staff constantly improves its skill level. After all, with medical knowledge and standards of care ever evolving, every health care practitioner should continue to develop skills and knowledge.

The Edgehill Skilled Nursing and Rehabilitative Care team is second to none — and determined to stay that way.
