

Signature Services

Edgehill's Signature Services is a fee based, medication management concierge program for Independent Living Residents.

It is led by the Wellness Nursing Director under the license and regulations of Assisted Living. Participants must have a comprehensive assessment done by the nurse with physician certification that their health condition status is both chronic and stable. Should that status change a reassessment must be done to determine appropriateness.

These services may be augmented in conjunction with Visiting Nurse (Medicare) services when necessary.
